Hiring Manager

Deloitte

Dear Hiring Manager,

I am writing to express my interest in UI Full stack Developer- Gen AI - Consultant (I&T - Deloitte Engineering) position at your esteemed organization. As a graduate B.Tech. Computer Science Engineer from Guru Gobind Singh Indraprastha University, with strong internship experience and a practical background in web development, data analysis, and AI applications, I am confident in my ability to contribute effectively to your development team.

During my internship at **NBCC India Limited**, I worked on multiple real-world projects where I developed and tested internal web applications using ASP.NET and Visual Basic. One of my key contributions was designing and implementing a full-stack **Canteen Management System** using **React.js**, **Django**, and **MS SQL Server**, enhancing operational efficiency and user interaction. My earlier internship with **Indraprastha Gas Limited** also exposed me to enterprise-level data visualization through **Power BI**, where I developed an interactive dashboard mapping physical server rack data for IT infrastructure monitoring.

I am proficient in Python, C/C++, and web technologies, and have a strong command over frameworks such as Django and Flask. My technical projects, including an **AI-based Tic-Tac-Toe game**, **Face Detection System**, and a **Movie Recommendation Engine**, reflect my capability to apply machine learning and data preprocessing techniques to build scalable applications.

In addition to my technical competencies, I have co-authored research papers published in IEEE Xplore and hosted an international conference on Computational Intelligence, showcasing my initiative and leadership in academic and collaborative environments.

I am excited about the prospect of contributing to your team, where innovation, learning, and impact go hand in hand. Thank you for considering my application. I welcome the opportunity to further discuss how my background aligns with your company's goals.

Sincerely,

Sameer
